🎓 EDUCATION

University of Washington (Seattle campus)

B.S. Computer Science, Minor in Business

President and Co-founder of Clearvote, Algorithmic Trading Club, Salsa Club, UW Farm

December 2024

GPA: 3.70/4.0

🔗 EXPERIENCE

Clean Power Research, Software Engineering Intern 🔗

June 2024 — October 2024 | Bellevue, WA

- Designed and implemented a scalable, fault-tolerant, **.NET** app that inserts charts into PDFs via dependency injected data
- Extended existing orchestration infrastructure with **AWS Lambda** to connect with a containerized **Node.JS** app
- Designed new charts generated for on-demand reports in under 5 seconds used by HVAC contractors across the country
- Wrote technical documentation and automated tests for debugging and monitoring to a production-ready coding standard

Clearvote, Co-founder 🔗

August 2023 — Present | Seattle, WA

- Founded a student-run non-profit developing a cross-functional, open-source **Next.js** application deployed through AWS
- Deployed a throttled, high availability **RESTful API** supporting over **over 3000 users** during a critical usage period
- Engineered an NLP pipeline using **GPT-4** to analyze political statements, extracting policy positions and generating quantitative metrics across five dimensions with 100% automation
- Designed a geospatial data system for candidate metrics, statement analysis, and district boundaries in **DynamoDB** for localized election information across the state of Washington

MCG Health, Software Engineering Intern 🔗

June 2023 — September 2023 | Seattle, WA

- Worked on the CareWebQI Team to overhaul an In-patient diagnostic and perscription tool used by **2,800 hospitals**
- Migrated from a deprecated version of **Angular** to work with a **.NET Core** backend
- Created a CI/CD pipeline in **Azure** for automated testing and deployment
- Added auto-completion and code lookup support for **70,000 medical care guideline codes**
- Applied agile project management principles in cross-team sprint planning sessions with **Confluence** and **JIRA**

📁 PROJECTS

ProtoQA Submission, NLP class research project under Prof. Yejin Choi 🔗

January 2023 — March 2023

- Developed a multi-model pipeline using Zephyr-7b-beta that outperformed GPT-2 baselines on ProtoQA's commonsense reasoning benchmark through prompt engineering
- Optimized model performance with WordNet similarity matching and 30-token generation, without the need for fine-tuning

Financial Portfolio Rebalancer, Full Stack Application 🔗

April 2024 — Present

- *Trade Dashboard*: Designed a responsive **Flutter** application for stock trades, prioritizing accessibility and UX design
- *Auto Trader*: Developed a **C++** Technical Analysis application with data caching to enable **sub-5-second stock speculations** and **>25% YOY returns** using an estimated moving average algorithm
- *Time Series Forecast*: Designing a **Kubernetes** cluster integrated with **Prometheus** and **Grafana** to ingest preprocessed stock data and train a supervised regression machine learning model for stock price time series forecasting

📚 SKILLS

Languages: Java, C++, C#, TypeScript, Python, Dart, C, R

Frameworks: Flutter (iOS, Anderoid development), .NET, Flask, React, Next.js, Vue, AngularJS

Frontend: REST API Integration, Client-Side State Management, HTML5, CSS3, ES6 JS

System Architecture: API and service development, x86-64, ARM, Distributed system design, OOP Design Patterns

Database Systems: ER Modeling, Relational Databases (SQLite, MySQL), NoSQL (DynamoDB)

DevOps: Kubernetes, Docker, CI/CD (Azure), Shell scripting (PowerShell, Bash), IaC (CloudFormation)

Testing: Monitoring (AWS CloudWatch), Testing (Unit, Integration, Performance), Test-Driven Development
